

Irfan Shaik

Data Analyst | SQL | Python | Power BI | Excel | Tableau

+91-9346647826 | irfu598@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | Hyderabad, Telangana, India

PROFESSIONAL SUMMARY

Aspiring Data Analyst with a Computer Science background and MBA in Human Resources, trained in SQL, Python, Excel, Power BI, and Tableau. Built practical experience through academic and personal projects in data cleaning, EDA, KPI analysis, dashboard development, NLP, and data visualization.

TECHNICAL SKILLS

Programming & Data Analysis: Python (Pandas, NumPy), SQL (Joins, Aggregations, Subqueries, CTEs, Window Functions)

BI & Visualization: Power BI (DAX, Power Query, Data Modeling), Tableau, Excel (Pivot Tables, XLOOKUP, SUMIFS, Charts)

Analytics: Data Cleaning, EDA, KPI Analysis, Data Visualization, Business Insights, Reporting

NLP & Machine Learning: NLP, TF-IDF, Scikit-learn, Multinomial Naive Bayes, TensorFlow, Keras

Tools: MySQL, Jupyter Notebook, Google Colab, GitHub, Streamlit

EDUCATION

Narsimha Reddy Engineering College | Hyderabad, India

MBA - Human Resources

Sri Gowtami Degree College | Yerragondapalem, India

BSc - Computer Science

PROJECTS

Retail Sales Dashboard | *Power BI* | [Github](#)

- Developed interactive dashboards using **DAX** and data **modeling** to track critical KPIs, including a +12% YoY profit margin, enabling regional performance analysis via drill-downs.
- Built drill-down analysis to identify regional and product-level performance trends.
- Automated data preparation using Power Query to create a clean and consistent reporting dataset.

SQL Retail Sales Analytics | *SQL* | [Github](#)

- Wrote **15+ SQL queries** using Joins, CTEs, Aggregations, and Window Functions to analyze sales performance.
- Identified top-performing products and revenue contribution patterns to support sales and inventory analysis.
- Created repeatable SQL queries for weekly sales reporting and KPI analysis.

Amazon Product Reviews Sentiment Analysis | *Python, NLP, Scikit-learn, Streamlit* | [Github](#)

- Cleaned Amazon reviews using Pandas and NLP preprocessing, including lemmatization, stopword and punctuation removal.
- Applied **TF-IDF** vectorization and trained a **Multinomial Naive Bayes** classifier to predict Positive, Neutral, and Negative sentiment, achieving **82.5% test accuracy**.
- Evaluated the model using **Precision, Recall, F1-score, Classification Report, and Confusion Matrix**, and developed a **Streamlit application** for real-time sentiment prediction.

Zomato Restaurant Analytics | *Python, Tableau* | [Github](#)

- Cleaned and processed a **10,000+** row restaurant dataset using Python (Pandas, NumPy).
- Conducted **EDA** to analyze ratings, ordering behavior, and restaurant performance.
- Built interactive Tableau dashboards to analyze restaurant performance, ratings, pricing, and ordering behavior.
- Derived actionable insights on pricing strategies and the impact of online ordering on restaurant revenue.

PROFESSIONAL EXPERIENCE

Data Analytics Training | *SkillIt Academy*

- Building applied proficiency in SQL, query optimization, and data analysis through structured coursework and projects.
- Developing business dashboards and reports in Microsoft Excel to translate raw data into actionable insights.

Data Intern | *NIIT & NSDC Skill India*

- Performed data validation across 5+ datasets, resolving 95% of inconsistencies and ensuring data integrity.
- Cleaned and standardized raw data, reducing preprocessing time by 25% for analytics workflows.
